

MBAEGBU CHIMDALU JUSTICE

Computer Science Graduate | Frontend Developer | AI Training Specialist

Onitsha, Anambra State, Nigeria • +234 805 569 5633 • +234 916 825 7764 • chimdalumbaegbu@gmail.com • linkedin.com/in/chimdal-justice-24088625b • github.com/ltzChimmy029

PROFESSIONAL PROFILE

Computer Science graduate with practical, hands-on experience across frontend web development, Python programming, and applied artificial intelligence. Proven success designing responsive web applications and contributing to AI systems through prompt engineering and data quality assurance. Combines a completed final-year machine learning project on hypertension diagnosis with professional experience training and evaluating AI models. Strong analytical thinking, comfortable working independently in remote, deadline-driven environments, and focused on building scalable solutions that create real impact.

PROFESSIONAL EXPERIENCE

AI Training Specialist <i>Outlier AI Remote</i>	2025 – Present
- Designed structured prompts and evaluated LLM outputs for accuracy, coherence, and safety, delivering corrective feedback to improve model behavior. - Performed advanced reasoning tasks and detailed data annotation, contributing directly to AI quality assurance pipelines. - Maintained high consistency and productivity in a fast-paced remote environment, reducing model error rates through iterative feedback.	
Frontend Developer <i>Lily Solutions Limited Abuja</i>	2025 – 2026
- Built responsive, cross-browser web interfaces using HTML5, CSS3 (Flexbox/Grid), and JavaScript, aligning implementation with pixel-perfect designs. - Collaborated with designers to enhance UI/UX, improving user engagement by 18% across key projects. - Optimized page speed through code splitting and lazy loading, achieving Lighthouse performance scores of 90+.	
Web Developer <i>Cruz Tech Abuja</i>	2025 – 2026
- Developed scalable web applications with clean, maintainable code, refactoring legacy modules for improved performance. - Resolved critical frontend bugs and improved navigation flow, contributing to a 15% decrease in bounce rate. - Assisted with CI/CD deployment and cross-team code reviews to ensure high-quality releases.	
IT Personnel <i>Junior Concepts Ltd.</i>	At Intervals
- Provided hardware and software support, diagnosed system problems, and maintained system integrity across daily operations. - Reduced average downtime through proactive diagnostics and user training sessions.	

FINAL-YEAR PROJECT

Development of a Machine Learning Model for Diagnosis of Hypertension <i>Python · Machine Learning</i> <i>Final-Year B.Sc. Computer Science Project, Coal City University</i>
- Designed and developed a supervised machine learning approach to support the diagnosis of hypertension from patient health data, including data preprocessing and dataset preparation. - Trained, compared, and evaluated multiple machine learning algorithms, applying the resulting model to predictive, diagnosis-support analysis.

SELECTED PROJECTS

Vee Skincare N' Spa — Client Website <i>HTML · CSS · JavaScript</i>
- Developing a professional website for Vee Skincare N' Spa, a skincare and beauty business. The website includes business information, service listings, and an appointment-booking interface. - Designed with a premium visual direction, responsive layouts, and interactive elements to provide a polished user experience.

Personal Portfolio Website | *HTML · CSS · JavaScript*

- Designed and developed a personal portfolio website to showcase my professional profile, technical skills, experience, CV, and software development projects.
- Built with responsive layouts and interactive elements to present my work and establish my professional online presence.

Trucking Company Website — Updated Version | *HTML · CSS · JavaScript*

- Developed an updated, responsive trucking company website featuring a modern homepage, company overview, and services section.
- Implemented shipment tracking, quote request and booking/contact forms, working multi-page navigation, and interactive elements with animations to improve the user experience across devices.

Personal Portfolio Website | *HTML5 · CSS Flexbox · JavaScript*

- Designed a fully responsive portfolio with semantic HTML5, CSS Flexbox, and interactive JS components; achieved 100% responsive scores across devices and optimized for SEO.

Cryptocurrency Peer-to-Peer System (In Progress) | *Python*

- Building a blockchain-inspired Python system with block structure, SHA-256 hashing, and proof-of-work, simulating decentralized transactions with a focus on integrity, transparency, and security.

Frontend Component Library | *HTML · CSS Grid · JavaScript*

- Created reusable UI components (auth forms, dashboards, landing pages) demonstrating advanced CSS Grid and responsive patterns, applying WCAG accessibility standards and cross-browser testing.

Chrome Extension — Lead Tracker | *JavaScript · Chrome API*

- Built a Chrome extension that saves and organizes business leads using the Chrome API and localStorage, with event-driven interactions and a modular render() function.

Additional Development Projects

Passenger Counter Application · BlackJack Game · BMI Calculator · Mathematics Calculator · Digital Clock · To-Do List Application · Pricing Table · Student Grade Calculator · Sign-Up Form with Validation

Practical HTML, CSS, and JavaScript projects covering DOM manipulation, conditional logic, real-time updates, and client-side form validation.

TECHNICAL SKILLS

Programming: Python (Advanced), JavaScript (ES6+)
Web Development: HTML5, CSS3, React.js, Flexbox/Grid, Responsive Web Development, DOM Manipulation, UI/UX Principles
AI & Machine Learning: Machine Learning, AI Model Training & Evaluation, Prompt Engineering, Data Annotation, Quality Assurance
Tools & Platforms: Chrome API, Git, GitHub, Browser Developer Tools, Blockchain Basics, Technical Troubleshooting, Deployment & Testing Support

EDUCATION

B.Sc. Computer Science	2022 – 2026
<i>Coal City University, Enugu State, Nigeria</i>	
• Best Outstanding Computer Science Student — 100 Level, 200 Level, and 400 Level, Coal City University.	
West African Senior School Certificate Examination (WAEC)	
<i>Royal Ambassadors Foundation Schools, GRA, Onitsha</i>	
National Examination Council (NECO)	2022
<i>Royal Ambassadors Foundation Schools, GRA, Onitsha</i>	

PROFESSIONAL DEVELOPMENT

- Actively learning React.js, Next.js, and advanced state management (Redux).
- Participating in AI/ML hackathons and prompt engineering workshops.
- Exploring smart contracts and decentralized applications (dApps).
- Completed certifications: Responsive Web Design (freeCodeCamp), Python Data Structures (Coursera).

CORE COMPETENCIES

Analytical & Problem-Solving · Rapid Adaptability & Learning · Cross-Functional Collaboration · Autonomous Project Execution · Precision & Detail Orientation · Debugging & System Optimization

INTERESTS & PASSIONS

AI Ethics · Blockchain · Web3 · Prompt Engineering · Strategy Games · Tech Literature
